

April 29	How did plants survive this?	
Overview	Notes	
<p>Watch this video from Wildflower Bee Farm: https://youtu.be/rFqOSzGrrjo</p> <p>While watching: Think about how we prepare for cold weather, do we change our clothing? Plan differently? What about plants and animals? Lots of researching to do – explore the way plants survive cold weather and what the honey bees need in order to live.</p> <p>Today’s goal: Find out what ways animals, plants and specifically bees do in order to survive harsh temperature and weather changes.</p> <p>Further research: Global news report on bees and starvation - https://globalnews.ca/news/5002843/okotoks-bees-winter-cold-survive/ Where bees go in winter - https://www.britannica.com/story/where-do-honeybees-go-in-the-winter Cold temperature and honey bees - https://sweetmountainfarm.com/index.php/new/cold-temperature-and-honey-bees Why bees are disappearing (TedTalk) - https://www.youtube.com/watch?v=dY7iATJVCso&feature=youtu.be</p>
