

April 5, 2021	What different flowers are providing pollen today	
Overview	Notes	
<p>Watch this video from Wildflower Bee Farm: https://youtu.be/YvhiXXTUJoU</p> <p>While watching: What are things that bees go after besides the hairy bittercress that is shown in the video? In the spring, are there any specific types of flowers that are attractive to honey bees during this season? What is your favourite flower name? As Hank has asked, how many different shades of pollen are going into the hive?</p> <p>Today's goal: Research what are some good flowers that bees are attracted to in the spring? Working on improving observational skills.</p> <p>Extending question: How many bees do you see fly into the hive?</p> <p>Spring flower resource to help assist in research: https://www.daviddomoney.com/10-best-early-spring-flowers-pollinating-insects/</p>
