

April 9, 2021	Go on a pollen hunt with us	
Overview	Notes	
<p>Watch this video from Wildflower Bee Farm: https://youtu.be/BJvhbJJhLrQ</p> <p>While watching: Figure out what kind of pollen is coming from the henbit deadnettle.</p> <p>You can keep an eye on how many honey bees come in with two rear legs full of pollen. You can include the importance of hunters and gatherers in discussion. The bee hive depends on this primitive way of life as humans did centuries ago.</p> <p>Today's goal: To explore the variety of pollen that comes into the hive.</p> <p>Further research on deadnettle and henbit: https://www.canr.msu.edu/news/purple_deadnettle_and_henbit_two_common_garden_spring_weeds</p>
