|---|-------------------------|--|
| August 11, 2021 | Flies are a pest | |
| Overview | Notes | |
| <p>Watch this video from Wildflower Bee Farm: https://youtu.be/RztKcNhksPQ</p> <p>While watching: Observe the flies and the behaviour of the honey bees. What type of fly is that in the video?</p> <p>Today's goal: Using previous skills – can we determine if the hive is failing? Review the pests that honey bees have to deal with, ie. Flies, mites and any other harmful predators to the honey bee.</p> <p>Further research: Types of flies - https://www.rentokil.com/ca/flies/species/ Bee predators - https://morningchores.com/bee-predators/</p> | | |
