

Press Release

Wildflower Bee Farm Names new Farm Sponsor

WildFlower Bee Farm from Blenheim, working to transform a 50-acre farm back to nature and honeybees, is pleased to announce that OSRClinics.com is the new farm sponsor. OSR Clinics Inc. provides mental health and child assessments, including ADHD, in Chatham Kent, Windsor, London, and Sarnia. In addition, the Farm will receive support in building honeybee genetic diversity, planting more trees and wildlife habitat with improved technology.

“It’s a great feeling to have OSR Clinics come full circle to help us in our work on the Farm. Dan and Malini are amazing clinic owners and operators. These entrepreneurs understand the link between a healthy environment and our mental health,” said Henry Svec, a founder of the clinics and now operator of the Wildflower Bee Farm.

OSR Clinics Inc. receives 25 tons of Carbon Credits, supporting preserving over 2 million liters of fresh water and 350,000 bees. They will also be acknowledged at WildFlowerBeeFarm.com and each coloring book page located at the Bee Science Club. As a result of their support, over 14,000 children across Canada now have access to the Bee Science Club, helping teachers and parents help children better understand our environment and the role of natural pollinators and the honeybee in our survival.

“We visited the bee farm in its earlier days and loved how interested and engaged our then 7-year-old son was. As an organization, OSR Clinics is committed to finding new ways to enhance children’s learning through the assessment work we do. So hearing about how the Bee Science Club is helping children learn about the complexities of the world around us in a fun way made the site sponsorship seem like a natural fit,” said Malini Ondrovčík, Clinical Director of OSR Clinics Inc.
